another question until the item is identified.

## **Creating a Dichotomous Key - Georgia Virtual School**

A dichotomous key is built around pairs of statements that describe a visible trait. The reader must select the statement in each pair that best describes an organism. By following the steps in the key, the reader narrows down the list of choices and finally names the organism.

## **Chapter 18 Lab Dichotomous Keys**

A dichotomous key is a very useful tool. It helps you identify unknown organisms by using a system that breaks down the characteristics of a set of organisms into TWO groups over and over again until you only have one organism in a group (Di = two and you only have two choices at each splitting of groups). Building a dichotomous key is not as hard as you might think it would be. All it takes is a bit of concentration.
