INTERNATIONAL ISO STANDARD 14405-1

Abstract ISO 14405-2:2011 illustrates the use of geometrical tolerancing for dimensions that are not linear sizes to avoid the ambiguity that the use of \pm tolerances on these dimensions causes. Both linear and angular dimensions, except size of features of size, are covered.

The status of ISO 14405-1 in the GPS concept. ISO 14405-1 is right below the ISO 8015 basic standard in the GPS hierarchy and represents the main standard for geometric dimensioning and tolerancing. It establishes the default specification operator – thus the default drawing indication – for linear size and provides options to modify this default specification operator.
