three metrics and setting targets based on those metrics. The three metrics that make up the overall pavement rating are International Roughness Index (IRI) measuring pavement smoothness, rutting and fatigue cracking.

Key Performance Indicators - omb.alaska.gov

As such, it is recommended that program managers also consider the core issues 12 for evaluation (i.e. relevance and performance) and consult with heads of evaluation when developing the performance indicators. There are two types of indicators: quantitative and qualitative. Quantitative performance indicators are composed of a number and a unit. The number indicates the magnitude (how much) and the unit gives the number its meaning (what), e.g. the number of written complaints received.
