Laserline 862TH/862TL - Combined Alarm/Immobiliser MC1 - MIRRC Test No. TMC1 - 177/1002 These instructions are intended to familiarise you with their simple operation. Note: There are 2 versions of the 862T, the only difference between the units are the internal inclination sensors. Depending on the mounting position of the

GB 862TH - Laserline - Cruise Control

Laserline diode lasers have gained broad use as beam sources, especially in wafer inspection systems for the analysis of defective bridge elements, the detection of remains or scratches in the oxide layer. A more recent field of application is the soldering of highly complex components as a real alternative to reflow soldering.
