Nelson, Karen - TCU - The Neeley School of Business

Abstract. This paper reports descriptive evidence about how managers attempt to manage earnings, based on a sample of 515 earnings-management attempts obtained from a survey of 253 experienced auditors (and also analyzed by Nelson et al. 2002). We classify attempts first according to primary approach: expense recognition, revenue recognition, issues unique to business combinations, and other issues.

In contrast, audit fees are negatively associated with these earnings management indicators. These results are robust to a variety of alternative variable definitions and model specifications. Specifically, contrary to the claims of Ashbaugh et al. (2002), the results are robust to the use of performance-matched discretionary accruals.
