Youth - National Suicide Prevention Lifeline

It was then expanded and adapted by Stanley and Brown to be used as a standalone intervention with adults (Stanley & Brown, 2008, 2012) and as a strategy within CBT for Suicide Prevention for suicidal adolescents (Stanley et al., 2009). The rationale for the SPI is that suicidal crises are usually time-limited, and consist of a period of suicidal desire and urges, followed by a decrease in the desire for suicide.

Assessment and Management of Suicide Risk in Children and ...

The suicide rate in adolescents has been on the rise for the last decade. Clinicians need to have information on basic suicide-related statistics and epidemiology. Clinicians need information on ways to perform an independent risk assessment of self-directed violence upon initial contact and in ongoing relationship with adolescent patients.

Suicide Risk Assessment of Adolescents | Symptom Media

Some of the potential warning signs that a teen may be suicidal include talking about or threatening suicide. Mood swings, changes in routine, withdrawal from friends and family, risky or self-destructive behaviors, and giving away possessions are also signs that a child may be thinking about or at risk of suicide.
